UPG-P250 ₩

POWERED BY

Three phase

water cooled

DIESEL

Battery Charging Alternator

Ratings @ 0.8 PF

VOLTAGE	FREQENCY	PRIME RATING		STANE	-BY RATING
230/400 v	50 Hz	250.0 kva	200.0 kw	275.0 kva	220.0 kw

These ratings are applicable for supplying continuous electrical power (at variable load). There is no annual hours limitation and this genset can supply 10% overload for 1 hour in 12 hours

Stand by

These ratings are applicable for supplying continuous electrical power(at variable load) in the case of emergency power supply. No overload is permitted on the ratings.

The alternator on this model is peak continuous rates (as defined in ISO 8528-5)

Some of the specifications are not standard on all Genset models.

Genset Standard Specification		
Model	UPG-P250	
Base frame	Heavy duty fabricated steel	
Circuit breaker	ABB 3 pole MCCB (4 pole is optional)	
Engine speed	1500 RPM(50HZ)	
Fuel tank capacity/L)	468 - open	
Fuel tank capacity(L)	465 - closed	
Air inlet	Mounted air filter	
Induction system	Turbo charged and air to charge cooled	
Combustion system	Direct injection	
Fuel system	Fuel injection pump	
Fuel filter	Split element	
cooling system	Water-cooled	
Electric Equipment	24 v starter motor and 24 v DC alternator And ECM	

All information in this document is substantially correct at time of printing and may be altered subsequently.

Genset Model	UPG-P250
Engine Model	Perkins 1206A-E70TTAG3
Alternator Model	TAL 046 D
Controller Model	DSE 6120

Make	Leroy Somer
Model	TAL 046 D
Insulation class	Н
No of bearing	1
Total harmonic content	at no load <2.5% / <2% at linear load <5% / <5%
Winding pitch	2/3
Ingress Protection	IP23
Altitude	≤1000m
Overspeed	2250 R.P.M
AVR Model	R150
Excitation system	SHUNT
Voltage regulation(steady)	± 0.8% / ± 1%

Enclosure

SILENT FEATURES:

- Lockable external fuel filling point Internal /External fuel connection External oil drainage

- External coolant drainage
 Air inlet /outlet louvers
 Sound splitters at radiator side (only for 1000 KVA and above) (For 725-880 KVA vertical air discharge)
- Common earth connection

- powder coated galvanized canopy Cooling fan and battery charging alternator fully guarded Engine, radiator, fuel fill and battery can only be reached via lockable access doors

HIGLY CORROSION RESISITANCE CONSTRUCTION

- Carbon steel locks and hinges
- Body made from galvanized steel components treated with polyester powder coating

TRANSPORTABILITY

- Tested and certified single point lifting facility
- · Forklift legs available

SOUND PRESSURE LEVEL

80 - 85 dBA at 3 meters (standard)

SECURITY AND SAFETY:

- Control panel viewing window in a lockable access door

- Emergency stop push button (red) fixed externally for quick access Cooling fan and battery charging alternator fully guarded Fuel fill and battery can only be reached via lockable access doors Exhaust silencing system totally enclosed for operator safety

Control Panel Data		
Make	Deep Sea	
Model	DSE 6120	

Controller key features

The DSE DSE 6120 is an Auto Start Control Module for single genset applications. It includes a backlit LCD display which clearly shows the status of the engine all the times. This module can either be programmed using the front panel or by using the DSE configuration suite PC software.

Metering and Alarm indications:

- Generator frequency
 Underspeed, Overspeed
- · Generator volts (L-L, L-N)
- Generator current
- · Engine oil pressure
- · Engine coolant temperature
- Hours run counter
 Battery volts
 Fail to start/stop
- Emergency stop
- · Charge fail · Low DC voltage

All information in this document is substantially correct at time of printing and may be altered subsequently.

FUEL SYSTEM

On Generating Sets up to 700 KVA, the baseframe design is incorporated with an integral fuel tank with a capacity of approx. 8 hours running at Full Load. The tank is supplied complete with fill cap breather, fuel feed and return lines to the Engine and drain plug.

Silencer noise reduction level	50 Hz
dBA	12
Max allowable pressure	50 Hz
Кра	10
Exhaust gas flow m/min	50 Hz
Prime	30.9
Standby	33.66
Exhaust gas temperature °C	50 Hz
Prime	515.8
Stand by	511.0

AUTOMATIC VOLTAGE REGULATOR (AVR)

The fully sealed Automatic Voltage Regulator maintains the Voltage Regulation at ±1%. Nominal adjustment by means of a trim pot incorporated on the AVR.

MOTOR STARTING

An overload capacity equivalent to 300% of the Full Load impedance at zero Power Factor can be sustained for 10 seconds, when PMG option is fitted

COUPLING

The Engine and Alternator are directly coupled by means of an SAE flange. The Engine flywheel is flexibly coupled to the Alternator rotor.

ANTI-VIBRATION MOUNTING PADS

Anti-Vibration pads are affixed between the Engine / Alternator feet and the Baseframe thus ensuring complete vibration isolation of the rotating assembly.

SAFETY GUARDS

The Fan & Fan Drive along with the Battery Charging Alternator are Safety Guard protected for personnel protection.

FACTORY TESTS

The Generating set is load tested before dispatch All protective devices control functions and site load conditions are simulated. The generator and it's systems are checked before dispatch.

DOCUMENTATIONS

Operation & Maintenance manual, Circuit wiring diagrams and Commissioning / Fault Finding accompanied with the Generator.

QUALITY STANDARDS

Compliance with BS4999, BS5000, BS5514 IEC 60034, VDE0530, NEMA MG 1.22 and ISO 8528 standards.

WARRANTY

All of the Generating Sets are covered under a warranty policy for a period of 12 months. Warranty of the equipment is in line with manufacturers warranty terms & conditions.
